

## GENESIS - Part VII

Reference: miscellaneous scripture  
Pastor Larry Webb

---

On day number six, God created both land animals and man...and those animals God created included \_\_\_\_\_.

### Genesis one

**verse twenty-four**, “Then God said, ‘Let the earth bring forth the living creature according to its kind: cattle (cattle represent four-footed animals) and creeping thing (that includes insects and small mammals) and **beast of the earth** (and that phrase includes dinosaurs) each according to its kind” and it was so.”

**verse twenty-five**, “And God made **the beast of the earth** (including dinosaurs) according to its kind, cattle according to its kind, and everything that creeps on the earth, according to its kind. And God saw that it was good.”

**verse twenty-six**, “Then God said, ‘Let Us make **man** in Our image, according to Our likeness; let them have dominion over the fish of the sea, over the birds of the air, and over the cattle, over all the earth and over every creeping thing that creeps on the earth.”

Reference: **Acts 17:24**, Paul announced to the Athenians, “God, who made the world and **everything in it** (including dinosaurs), since He is Lord of heaven and earth...”

**Definition:** transitional fossils are the fossils of species that \_\_\_\_\_ the extinct or present-day animal to the ancestor it was supposed to have evolved from.

If there is no transitional fossil, then that gap between species is called a \_\_\_\_\_; i.e. the gap between an animal and the ancestor it supposedly evolved from, and that gap exists because there is no transitional fossil record.

Reference: **Isaiah 27:1**, “In that day the Lord with His severe sword, great and strong, will punish **Leviathan** the fleeing **serpent**, **Leviathan** that twisted **serpent**, and He will slay the **reptile** that is in the sea.”

This term *Leviathan* is also mentioned in four other Old Testament texts:

**Job 3:8; 41:1-34; Psalm 74:14 and 104:26**

*Leviathan* might have been a now-extinct dinosaur that primarily inhabited the seas and oceans similar to the ancient *Liopleurodon* or the *Sarcosuchus Imperator* (super croc).

Reference: **Job 41:1-34** (see screen)

Reference: **Psalm 74:13**, “You divided the sea by Your strength; You broke the heads of the **sea serpents** in the waters.”

The Hebrew word that is translated here as sea serpent is most often translated as \_\_\_\_\_ (the older edition of the King James edition even translates this word as dragon).

Dragons are mentioned \_\_\_\_\_ in the Old Testament and were found on both land and water.

Then another strange dinosaur-like creature is mentioned in Job and his name is \_\_\_\_\_.

Reference: **Job 40:15-24** (see screen)

**Sir Richard Owen** (1804-1892) was an English biologist and paleontologist from the nineteenth century. He found some dinosaur bones and in 1841 he became the first person to use the term “dinosaur.” It was “*dinosauria*” from two Greek words that meant “\_\_\_\_\_...” or a “*fearful and great reptile*.”
